SINGLE SOURCE

PPI has provided support and custom programming to companies since 1988.

We have worked with a wide variety of companies such as wholesalers, manufacturers, retailers, finance and communication companies.

No project is too small or too large. Many customers rely on PPI for all of their IT needs due to our wide variety of experience.

Why Use PPI?

Owners and managers often have great ideas to improve their operation, but small to mid-size companies do not have the expertise on staff to implement the projects.

The IT industry is changing very fast and it takes a company providing services to a wide range of customer to stay on top. PPI has the staff, experience, expertise and very competitive rates. We do not require support contracts. Just call us when you need us.
